

# BSH Cylindrical columns Spruce

Cylindrical columns made of Gluelam grant your building an individual and characteristically touch. Many rotationally symmetrical forms are possible. The Gluelam used for the production of the cylindrical columns, is produced according to DIN 1052 part 1. Only selected lams are used. The gluing is made with a high quality melamine adhesive.

## Technical Characteristics

|                    |                                |
|--------------------|--------------------------------|
| Max. diameter:     | 90 cm                          |
| Max. length:       | 20 m                           |
| Standard adhesion: | Melamine adhesive              |
| Surface:           | Finishing in grain's direction |
